PROFESSIONAL SUMMARY

Results-driven **Senior Data Analyst** with 4+ years of experience delivering scalable analytics solutions across **SaaS, networking, and enterprise technology domains**. Proven expertise in **data modeling, predictive analytics, and CRM intelligence**, leveraging **SQL, Python, Power BI, and cloud platforms (AWS, Azure)** to drive business growth and operational efficiency.

Strong track record of partnering with **product, sales, and marketing teams** to optimize **customer lifecycle, revenue forecasting, and retention strategies**. Experienced in **building modern data pipelines, implementing data governance, and enabling self-service BI ecosystems**.

CORE SKILLS

- **Programming & Querying:**
SQL (Advanced: CTEs, Window Functions, Stored Procedures), Python (Pandas, NumPy, Scikit-learn), R
 - **Data Visualization & BI:**
Power BI, Tableau, Looker, Excel (Power Query, Pivot Tables), IBM Cognos
 - **Cloud & Big Data:**
AWS (S3, Redshift, Glue, Lambda), Azure (Data Factory, Synapse), Google BigQuery, Snowflake
 - **CRM & Business Systems:**
Salesforce, Zoho CRM, HubSpot, ServiceNow, Jira, Confluence
 - **Data Engineering & Architecture:**
ETL Pipelines, Data Modeling, Data Warehousing, Apache Spark, Data Governance, Data Quality
 - **Analytics & Advanced Techniques:**
Predictive Modeling, Machine Learning, A/B Testing, Time Series Forecasting, Statistical Analysis
 - **Business Domains:**
Customer Analytics, Marketing Analytics, Revenue Operations (RevOps), Product Analytics, Network Analytics, FinTech
-

PROFESSIONAL EXPERIENCE

Data Analyst | IBM | USA | Nov 2024 – Present

- Designed and deployed **enterprise-grade Power BI dashboards**, improving executive decision-making speed by **35%** across Fortune 500 clients.
 - Built scalable **ETL pipelines using SQL, AWS Redshift, and IBM Cloud**, reducing data processing time by **50%**.
 - Developed **predictive analytics models (Python, Scikit-learn)** to improve revenue forecasting accuracy to **94%**.
 - Implemented **self-service BI solutions**, reducing stakeholder reporting turnaround time by **40%**.
 - Led **data governance initiatives**, reducing data quality issues by **60%** through validation frameworks and anomaly detection.
 - Partnered with **sales and CRM teams** to optimize pipeline visibility and customer segmentation strategies.
-

Data Analyst | Cisco | USA | Aug 2022 – Dec 2023

- Built **real-time monitoring dashboards** analyzing 500K+ daily network events, reducing downtime by **28%**.
 - Developed **predictive maintenance models**, improving system reliability and reducing outages by forecasting failures 48 hours in advance.
 - Delivered **cost optimization analytics**, saving **\$1.2M annually** by identifying redundant infrastructure and inefficient data flows.
 - Translated technical data into **business-friendly dashboards**, increasing adoption by **70%** across operations teams.
 - Automated reporting workflows using **Python and ServiceNow integration**, cutting reporting time by **45%**.
 - Collaborated with **IT, operations, and product teams** to align analytics with business KPIs.
-

Data Analyst | Zoho Corporation | India | Oct 2020 – Jul 2022

- Improved **CRM conversion rates by 18%** through customer behavior analysis and funnel optimization.
- Reduced **customer churn by 15%** by developing predictive churn models and retention strategies.
- Built **automated reporting systems** for product and marketing teams, accelerating reporting by **55%**.
- Conducted **A/B testing and campaign analysis**, improving marketing ROI by **24%**.

- Designed and enforced **data quality frameworks**, achieving **99.2% data accuracy SLA**.
 - Worked closely with **Salesforce and Zoho CRM teams** to enhance customer lifecycle analytics.
-

EDUCATION

Master's in Business Analytics ----Wayland Baptist University, USA — *Dec 2025*

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900)
- Data Analytics Job Simulation – Deloitte
- Data Specialist Volunteer – DESK Community Service
