

Koti Reddy - Full Stack Developer

📍 Hyderabad, India ✉ mareddykotireddy1919@gmail.com ☎ 9542540010 🌐 GitHub 🔗 LinkedIn

Professional Summary

Experienced Full Stack Developer with 3+ years of hands-on experience designing, developing, and deploying scalable web applications across diverse industries including E-Commerce, Logistics, Rental Services, HR Tech, and Music. Proficient in React.js, TypeScript, Node.js, Express.js, PostgreSQL, and RESTful API design. Adept at leading cross-functional teams, managing end-to-end project lifecycles, and aligning technical strategies with business objectives to deliver impactful, user-centric solutions.

Technical Skills

Frontend: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Next.js, Redux Toolkit, Ant Design, TailwindCSS, Bootstrap, jQuery

Backend: Node.js, Express.js, .NET, RESTful APIs, GraphQL,

Databases: PostgreSQL, MySQL

Tools & DevOps: Git, Docker, Jenkins, Postman, Vite

Other: RBAC, Axios, Web Audio API, Cloud Integration, Agile/Scrum

Professional Experience

Full Stack Developer

eArbor LLP

March 2022 – Present

Hyderabad, Telangana

- Led end-to-end development of multiple full stack projects spanning frontend (React.js, TypeScript) and backend (Node.js, Express.js, PostgreSQL) layers.
- Architected RESTful APIs and managed database schemas, ensuring high performance, scalability, and data integrity across all projects.
- Delivered projects across E-Commerce, Logistics, Rental Services, HR Tech, and Fashion industries — all within deadlines and to client satisfaction.
- Mentored junior developers, conducted code reviews, and enforced best practices for code quality and maintainability.
- Collaborated with UI/UX, QA, and backend teams to align development strategies with business goals and ensure seamless integration.

Key Projects

HRMS – Driver Recruitment Management System

- Led full stack development of a driver recruitment platform handling end-to-end HR workflows — from job posting and candidate screening to onboarding and compliance tracking.
- Built backend services using Node.js and Express.js with RESTful APIs for applicant management, document verification, and recruitment pipeline automation.
- Developed an intuitive admin dashboard with React 18, TypeScript, and Ant Design providing real-time visibility into recruitment status, driver profiles, and onboarding progress.
- Implemented Role-Based Access Control (RBAC) for Admins, HR Managers, and Recruiters — ensuring secure, permission-specific workflows.
- Engineered document upload, preview, and validation features with cloud integration and compliance checks for driver licensing requirements.
- Built reporting and analytics modules with interactive charts and exportable data to support data-driven hiring decisions.

Warehouse Management System (WMS)

- Developed scalable backend APIs using Node.js and Express.js for inventory management, real-time stock tracking, and warehouse operations.
- Built a responsive, high-performance frontend interface with React.js, reducing load times and achieving cross-browser compatibility via reusable component libraries.

- Designed advanced data visualization tools including interactive charts, real-time dashboards, and feature-rich tables with server-side pagination, nested sorting, filtering, and editable rows.
- Implemented RBAC to streamline permission-based workflows while integrating Excel import/export with validation for efficient bulk data handling.
- Collaborated with backend teams to architect efficient API workflows for real-time synchronization and bulk operations.

SBBS - Printers Rentals Management System

- Led full stack development of a printer rental platform covering service requests, dispatches, billing cycles, and engineer assignment with real-time API integrations.
- Built backend modules for automated invoicing and billing with custom cycle support, reducing manual workload and improving accuracy.
- Implemented an intuitive Kanban board for ticket management and a centralized dashboard for real-time inventory, billing, and engineer activity visibility.

Tealbord – Logistics Job Portal

- Built a logistics-focused job portal with role-specific dashboards (Admin, HR, Job Seeker) using Node.js/Express backend and React.js frontend.
- Implemented advanced job matching algorithms, application tracking with real-time updates, and an interview scheduling module with calendar integration.
- Integrated multi-authentication (email, LinkedIn, Google) for streamlined onboarding and enhanced security.

SongBrite – Music Platform

- Built a feature-rich music platform using React 18, TypeScript, Redux Toolkit, Ant Design, and Next.js with Web Audio API integration.
- Developed real-time audio playback, multi-track management, dynamic file upload with drag-and-drop, and secure purchase/transaction handling.
- Designed a 4-column Kanban workflow with glassmorphism UI, smooth animations, and mobile-friendly interactions.

EDUCATION

Bachelor Of Technology

Qis College Of Engineering and Technology, Andhra Pradesh – BTech CSE

12th (Science Stream)

Bhashyam IIT-JEE Junior College, Guntur, Andhra Pradesh – HSC
